

Jake Luecke

Software Engineer

Atlanta, GA | (225) 241-6586

luckyjake.me | github.com/jrluecke95 | linkedin.com/in/jake-luecke | jrluecke95@gmail.com

Software engineer who is ready and willing to pick up new technologies as needed. Dedicated to using my technical knowledge, professional experiences, communication skills, and attention to detail to create software that is innovative and client driven. Recently graduated from an accelerated program to develop and hone skills related to becoming a full stack engineer.

Software Development Skills

JavaScript, Python, React, Redux, Express, Node.js, REST, PostgreSQL, Bootstrap, HTML, CSS, Git

Education

DigitalCrafts | Certificate in Software Engineering | Atlanta, GA

January 2021 – May 2021

Louisiana State University | B.S. Kinesiology | Baton Rouge, LA

August 2013 – May 2017

Software Development Portfolio

PlatePool | [Deployed Here](#) | [Github](#)

April 2021

- Collaborated with a team of software engineers using Github and agile methodology to build PlatePool, a full-stack app to connect aspiring chefs to nearby consumers, without the restaurant overhead.
- PlatePool operates as a mobile food ordering and social media app. Chefs and consumers can interact through selling and ordering homemade cuisine, along with following and rating one another.
- Oversaw back-end functionality, including building the database and routes.
- Designed and developed user-friendly features including personalized logins, profile viewing, editing personal information, commenting, and menu editing options for the chefs.
- Utilized Material-UI, React, Node.js, Express, Sequelize, and Postgres to develop the app and create a functional and responsive user experience.

Reactive Recipes | [Deployed Here](#) | [Github](#)

April 2021

- Individually built a full-stack web application that allows users to login, submit, share, comment and review recipes.
- Built out models, migrations, routes, components and pages via Node.js, Express, Sequelize, Postgres, Bootstrap, and React to create a responsive and functional web app.
- Developed a complete user experience by using REST API requests to get data from internal and external sources.

Professional Work Experience

CrossFit Atlanta | Coach and Program Manager | Atlanta, GA

November 2017 – January 2021

- Collaborated with colleagues and supervisors to address member success and retention using CRM and other member-tracking software and apps.
- Built and maintained a rapport with clients, which included facilitating member requests and implementing feedback.
- Assisted with program management and operational tasks, including budgeting and scheduling.
- Developed group exercise plans and programs, including updating protocol for onboarding new members.
- Coached private and group exercises classes with upto twenty clients.
- Implemented safety and cleanliness standards for gym and equipment.
