Jake Luecke

Software Engineer
Atlanta, GA | (225) 241-6586
luckyjake.me | github.com/jrluecke95 | linkedin.com/in/jake-luecke | jrluecke95@gmail.com

Software engineer who is ready and willing to pick up new technologies as needed. Dedicated to using my technical knowledge, professional experiences, communication skills, and attention to detail to create software that is innovative and client driven. Currently enrolled in an accelerated program to develop and hone skills related to becoming a full stack engineer.

Software Development Skills

JavaScript, Python, React, Redux, Express, Node.js, REST, PostgreSQL, Bootstrap, HTML, CSS, Git

Education

DigitalCrafts | Certificate in Software Engineering | Atlanta, GA   January 2021 – May 2021

Louisiana State University | B.S. Kinesiology | Baton Rouge, LA   August 2013 – May 2017

Software Development Portfolio

Reactive Recipes | Deployed Here | https://github.com/jrluecke95/reactive-recipes   April 2021
- Individually built a full-stack web application that allows users to login, submit, share, comment, and review recipes.
- Built out models, migrations, routes, components, and pages via Node.js, Express, Sequelize, and React to create a responsive and functional web app.
- Developed a complete user experience by using REST API requests to get data from internal and external sources.

healthierU | Deployed Here | https://github.com/jrluecke95/healthierU   March 2021
- Collaborated with teammates to build a full-stack app that allows coaches and clients to register, sign-up, and interact with each other.
- Referenced prior experience to create an app that allows coaches to view clients and assign workouts, and provides clients with access to assigned workouts.
- Oversaw back-end app development by setting up routes and a database using PostgreSQL, Sequelize, Node.js, Express, JavaScript, Insomnia, and Beekeeper.
- Created a full-stack project built using Node.js, Express, PostgreSQL, JavaScript, HTML/CSS, and Sequelize.

Professional Work Experience

CrossFit Atlanta | Coach and Program Manager | Atlanta, GA   November 2017 – January 2021
- Collaborated with colleagues and supervisors to address member success and retention using CRM and other member-tracking software and apps.
- Built and maintained a rapport with clients, which included facilitating member requests and implementing feedback.
- Assisted with program management and operational tasks, including budgeting and scheduling.
- Developed group exercise plans and programs, including updating protocol for onboarding new members.
- Coached private and group exercises classes with upto twenty clients.
